THREATENED  
SPECIES  
COMMISSIONER

**Figure BIO2 Pressures affecting species listed as nationally threatened under the Environment Protection and Biodiversity Conservation Act 1999**  
Biodiversity (2016)

- Science, action and partnership
- Principles for Prioritisation
- Action Plan and Targets
- Backed by Australian Government investment

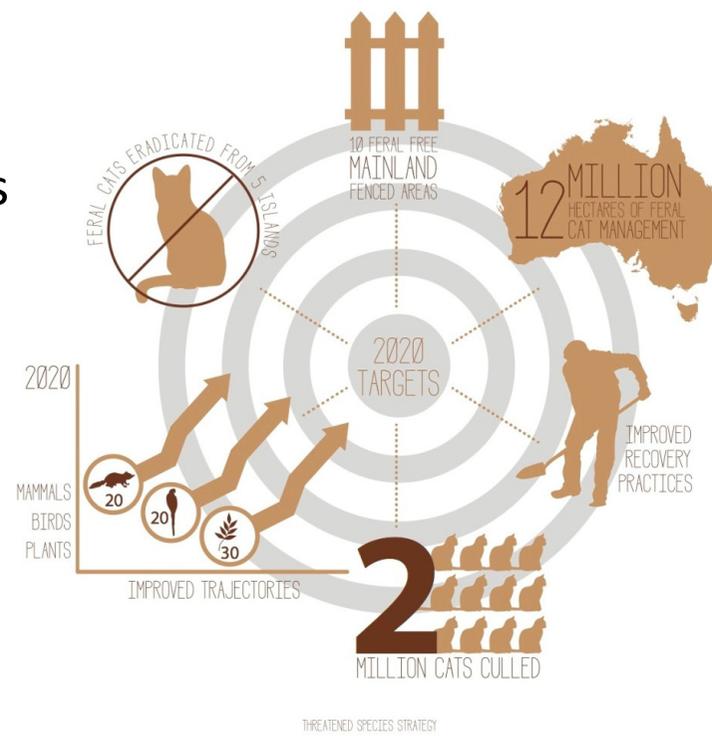

# ACTION AREAS AND TARGETS

Mardo (yellow-footed Antechinus), Robert Maclean

## Year five targets

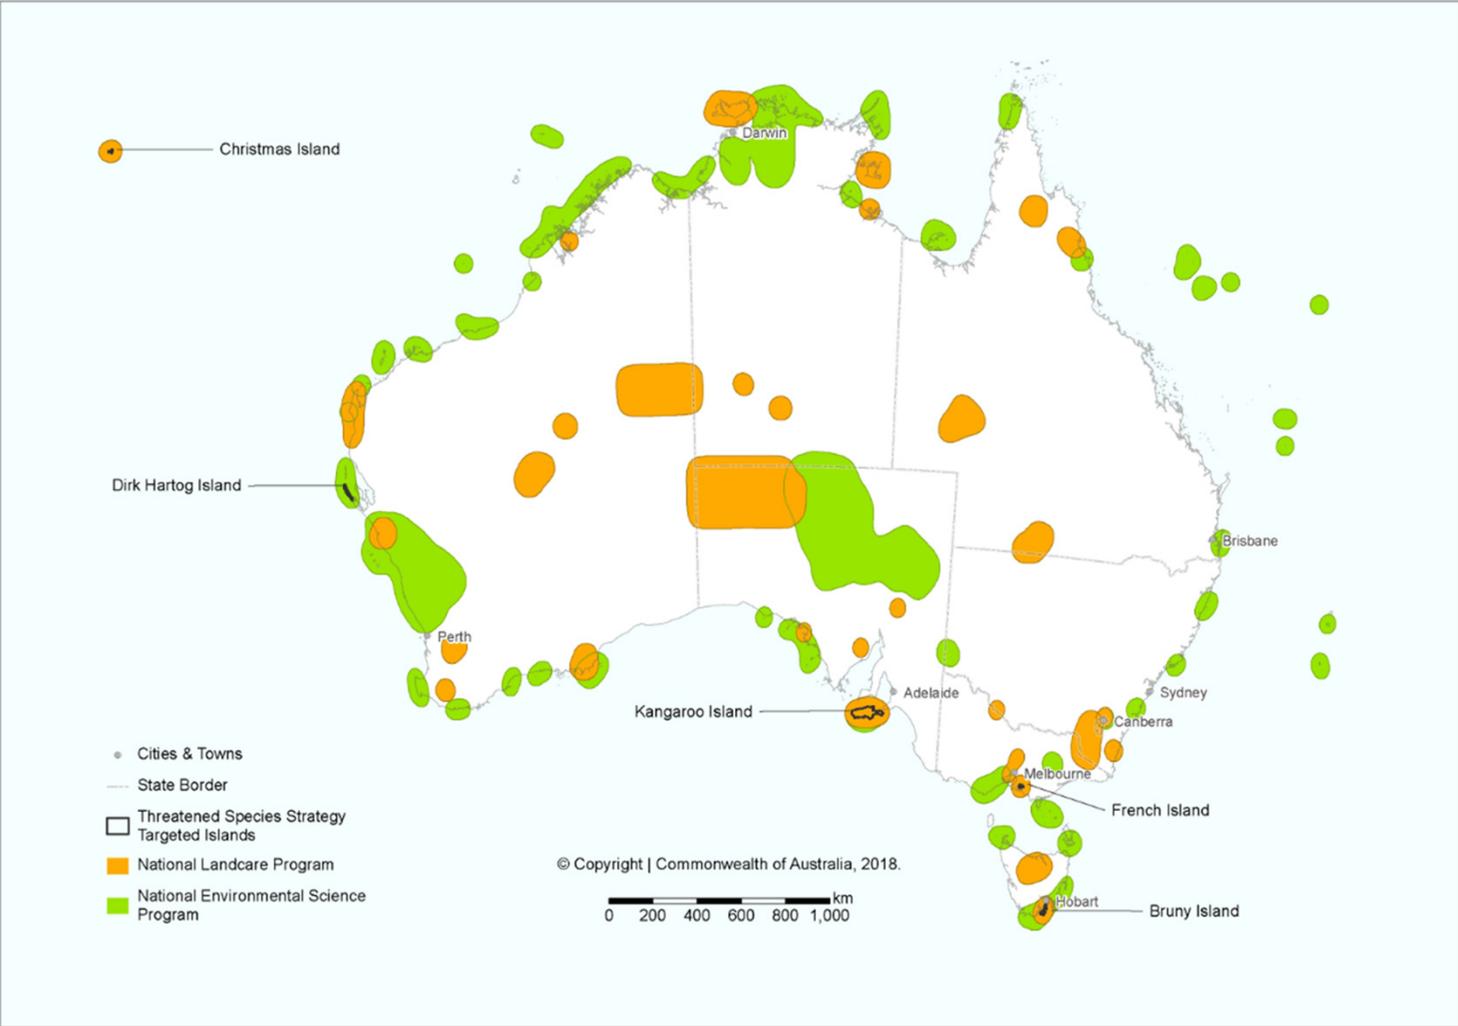

- Tackling feral cats and their impacts
- 20 mammals by 2020
- 20 birds by 2020
- 30 plants by 2020
- Improving recovery practices

- 2 million feral cats culled
- Eradication of feral cats from five islands
- 10 feral cat free mainland exclosures established
- Best practice feral cat control across 10 million hectares of open landscapes
- Best practice feral cat action across 2 million hectares of Commonwealth land

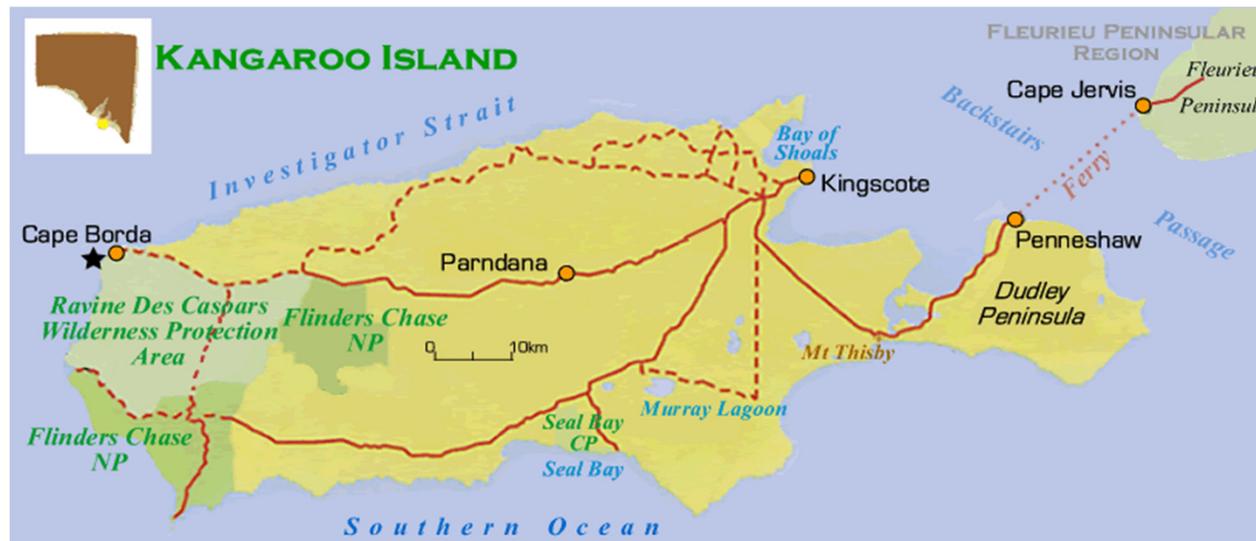

# WHAT HAVE WE BEEN DOING?

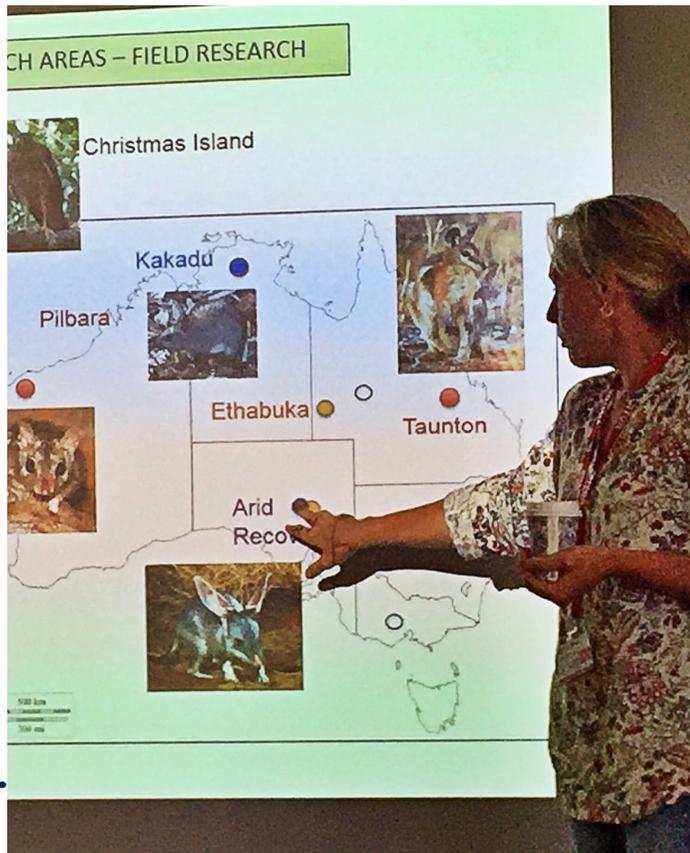

# KANGAROO ISLAND FERAL MANAGEMENT

- One of five islands identified for feral cat eradication under the Threatened Species Strategy.
- Successful eradication of feral goats and feral deer.
